

# K&B Financial Consulting LLC

Private investor and business advisor

---

## Investment Projects

### ☐ Banking Software

We are willing to invest in a software company that develops applications related to corporate finance or SME finance or international financial customer marketing and assist it in entering the Chinese market. In addition to investment, we will also contribute more market resources, meet the detailed needs of more banks, and improve the maturity of products.

### ☐ Logistics Platform

We expect efficient cooperation, we need a logistics information platform that integrates staff, transportation, goods and places, to be data-driven to improve supply chain efficiency. Precise management and control of orders, predictable results, and interactive data have truly become an applicable and valuable digital management tool for both drivers and users.

### ☐ Architectural Design

We are willing to invest in an innovative architectural design company. Through breakthroughs in new equipment and special materials, it will be able to enter the field of operation, and through the integration of certain new technologies, new processes, it will gradually develop towards the full life cycle of technology, manufacturing, service, operation, and maintenance.
